Remote Programming

FIRSTECH

DC3 MODULE MUST BE UNLOCKED/DISARMED TO ENTER REMOTE PROGRAMMING.

STEP 1:
Cycle ignition ON and OFF five times (5x OFF/ON) rapidly within 7 seconds. Leave on ON position.

STEP 2:
Parking Lights will flash once (1x).

STEP 3:
Press the LOCK button on the Compustar remote.*

STEP 4:
Parking Lights will flash once (1x)

STEP 5:
To program additional Compustar remotes, repeat steps 4 and 5 (up to 4 remote slots available).

STEP 6:
After you are done programming remotes, wait until you see two Parking Light flashes (2x).

STEP 7:
Turn ignition to OFF position.

!

IMPORTANT NOTE!
Programming will only work with a LOCK command. If using a 1-button remote, make sure not to double-tap (unlock) or hold (remote start) the button, or it will NOT learn.

REMOTE PROGRAMMING SUCCESS / ERROR CODES

RED LED x4: RS is running, must shut down first.

RED LED x5: Engine is running, must shut down first.

RED LED x6: System is armed or locked, must unlock/disarm to learn remote.
